More coordination and resource sharing between different HEIs could be of general benefit. And encourage the institutions, which successes in the implementation and management of E-learning to share their success with other institutions.

Partnerships should be developed between government, HE and the private sector. Government departments and the private sector should be encouraged to sponsor development of technologies in HE that will produce a workforce that is

Finally: Recommendations for governmental HE policies

Secondary: Recommendations for institution in implementation of policies

Firstly: Recommendations for factors that affect learner (students’ and instructors’) proficiencies

- Assess learners’ computer skills before they enrol for an E-learning course; course content should be designed to suit learning styles.
- E-learning course content should meet the requirement of National Qualifications Framework (NQF) and Libyan Qualifications Authorities (LQA) and should be continually revised and updated.
- HE Institutions should hire an adequate number of support staff to be responsible for administrative duties and take this heavy burden away from academic staff.
- Instructors should let learners know their availability schedule so that learners can know when to expect a response from an instructor. Additional staff members should be provided for support.
- Course content should be made available in different languages that will make learning easier for learners.

Course content should be made available in different languages that will make learning easier for learners. In Libya, there is two official languages (Arabic and English).

For E-learning to be successful in Libya, mindsets and attitudes towards learning of such diverse learners should be taken into consideration. There are learners from rich areas (such as Tripoli) and suburban areas with a lifestyle which is similar to more developed countries, and learners from areas like (Kufra) city who have third world experiences and never saw or used a computer until they reach HE.

Secondary: Recommendations for institution in implementation of policies

- Senior managers should declare their support for e-learning and allocate a fixed budget
- Training should be offered to instructors and course developers so that they can be more familiar with learning management systems and updated on changes to software and hardware.
- Technological learning tools should be maintained and kept up to date at all times.
- The issue of intellectual property, ownership and copyright should be addressed with course developers avoiding unnecessary battles over learning materials. HE institutions should have agreements and sign contracts with teaching and development staff on intellectual property, ownership and copyright.

Finally: Recommendations for governmental HE policies

More coordination and resource sharing between different HEIs could be of general benefit. And encourage the institutions, which successes in the implementation and management of E-learning to share their success with other institutions.

Partnerships should be developed between government, HE and the private sector. Government departments and the private sector should be encouraged to sponsor development of technologies in HE that will produce a workforce that is competent in technologies.
