APPENDIX A: The Interview Questions
Schedule / Protocol
Research Questionnaire for Direct Interviews

Before commencement:

1. Introduce Yourself and The Study

2. Name of Respondent: (Optional) ________________________________

3. Job Title/Position: ____________________________________________

First Part: -

**How the Concept of Organisational Agility is Understood and Perceived in Health Care Organisations.**

The following are a number of definitions of “organisational agility”: - (Give each respondent a copy of these definitions to read)

a. “An organisation-wide capability to respond rapidly to market changes and to cope flexibly with unexpected change in order to survive unprecedented threats from the business environment.”

b. “The successful exploitation of competitive bases (speed, flexibility, innovation proactivity, quality and profitability) through the integration of reconfigurable resources and best practices in a knowledge-rich environment to provide customer-driven products and services in a fast changing market environment.”

c. “The ability to thrive in an environment of continuous and unpredictable change.”

d. “A set of capabilities used by organisations to enable them to respond and adapt to changes in the environment.”

e. “The ability to move or act quickly and easily”

f. “The ability to co-ordinate and integrate selectively physical resources, people and processes, knowledge and skills, regardless of their organisational location, within an organisation or in other organisations: suppliers, partners, or even customers themselves, required to create, produce, deliver, and support a constantly changing mix of goods and services for changeable markets.”
**Question 1:** - After having been exposed to a number of definitions that can provide you with an idea of what “organisational agility” means: -

**1.a** What do you understand from the term: “organisational agility”? How would you describe it in your own words?

____________________________________________________________________________________________________________________

____________________________________________________________________________________________________________________

____________________________________________________________________________________________________________________

____________________________________________________________________________________________________________________

**1.b** What, from your experience and view, does the concept of “organisational agility” mean to and/or imply for a “health care provider” organisation/hospital?

____________________________________________________________________________________________________________________

____________________________________________________________________________________________________________________

____________________________________________________________________________________________________________________

____________________________________________________________________________________________________________________

**1.c** How relevant do you think the concept of “organisational agility” is to the “day-to-day” reality affecting the management and operation of a “health care provider” organisation (hospital)?

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Not Relevant</td>
<td>Most Relevant</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Reason/s:

If “Not Relevant”:

____________________________________________________________________________________________________________________

____________________________________________________________________________________________________________________

____________________________________________________________________________________________________________________

If “Relevant”:

____________________________________________________________________________________________________________________

____________________________________________________________________________________________________________________

____________________________________________________________________________________________________________________
1.d Do you feel that there is a definition from the previous list, which you feel/think best provides a clear idea of the concept of "organisational agility", if any? Why?
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________

1.e What would be the suggestions/modifications that you would make to any of these definitions so that it can provide you with a clearer idea of the concept of "organisational agility", in general?
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________

1.f What would be the suggestions/modifications that you would make to any of these definitions to make it more suitable to a "health care provider" organisation?
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________

Question 2:  
2.a Based upon your experience and professional view, what would be the definition that you would give for "Organisational Agility", when trying to explain the concept to your colleagues working in "health care provider" organisations / hospitals? (Either own definition or one from the list above)
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________

2.b Why do you think that this definition is the most appropriate in a "health care provider" organisation / hospital context?
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
Second Part: -

The Perceived Need for Agility in Health Care Organisations (Drivers of Agility).

**Question 3:** - 3.a From your experience, what are the main factors or parties that exist in the external environment affecting your hospital, which you consider to be the main sources of changes affecting the management and operation of your hospital, and the way it delivers health care services? *(List them)*

_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________

3.b What is the nature of changes associated with each of these factors?

_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________

3.c How do you think your hospital can respond to each/all of these changes? In other words, what, in your view and experience, are the capabilities or attributes that can enable your hospital to effectively respond and deal with these changes?

_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________

A1
Earlier in Question 3.a, you have identified a number of environmental factors affecting your hospital, which you consider to be the main sources of changes affecting the management and operation of your hospital, and its delivery of health care services.

**Question 4:** - 4.a Using the scale provided, how would you rate the extent to which changes brought about by each of the factors, which you have identified earlier, can be predicted/expected?

- a. ____________________  1  2  3  4  5  6

  [Highly Predictable Rate of Change]

  [Highly Unpredictable Rate of Change]

- b. ____________________  1  2  3  4  5  6

- c. ____________________  1  2  3  4  5  6

- d. ____________________  1  2  3  4  5  6

- e. ____________________  1  2  3  4  5  6

- f. ____________________  1  2  3  4  5  6

- g. ____________________  1  2  3  4  5  6
**Question 5: - 5.a** Using the scale provided, how would you rate the *amount of change* that is taking place in each of the environmental factors you have identified in **Question 3.a** as affecting your organisation?

**5.b** Also, using the scale provided, how would you rate the *importance* of each of these environmental factors, in terms of *their effect on the operation, delivery of health service and, thus, well being of your hospital*? [Probe for reasons]

**Question 6:**

6.a Who do you consider to be your customers? [Reasons for answer and probe.]

---

6.b What do you think are the things that these customers would expect from the service, which you may provide to them? *(If not mentioned in the answer to the question above)*
Question 7: 7.a Who are your *competitors* whom you consider to be competing with your hospital in its delivery and provision of health care services?
Question 8: 8.a The following are a number of environmental factors, which are believed to affect your hospital, and that are constantly changing. In your experience and view, and using the scale below, how would you rate the amount of change taking place in each of these environmental factors?

8.b Also, using the scale provided, how would you rate the importance of each of these environmental factors, in terms of their effect on the operation, delivery of health service and, thus, well being of your hospital?

Question 9: - 9.a The following are a number of environmental factors, which are believed to affect your hospital, and that are constantly changing. In your experience and view, and using the scale below, to what extent do you think the rate of change in each of these environmental factors is predictable (can be predicted)?

- Changes in the needs, requirements and expectations of Patients
  - 1 2 3 4 5 6
  - Highly Predictable
  - Highly Unpredictable

- Changes in the demand made by patients on your service
  - 1 2 3 4 5 6

- Changes in the needs, requirements and expectations of General Practitioners
  - 1 2 3 4 5 6

- Changes in the demand made by General Practitioners on your service
  - 1 2 3 4 5 6

- Changes in the needs, requirements and expectations of Health Authorities
  - 1 2 3 4 5 6

- Changes in the demand made by Health authorities
  - 1 2 3 4 5 6

- Changes in the structure of competition, in terms of the Emergence of New Competitors in the form of Private Sector Hospitals
  - 1 2 3 4 5 6
• Changes in the structure
Of competition, in terms of
the emergence of Overseas
Health Care Providers

Emergence of new competitors
In the form of Other NHS
Trusts /Hospitals

Changes in Governmental
Policies, Plans, and Initiatives
(Introduction Of new initiatives
and plans that affect the
management, operation and
delivery of health services)

Changes in Innovations
in Medical Technology
(e.g. New Drugs; New Methods
of Diagnosis and Treatment; etc…)

Changes in Supplies of Workforce
(e.g. Professional staff including
consultants, doctors, nurses)

Any other factors

Third Part: -

The Capabilities That Underpin The Agility of Health Care Organisations.

**Question 11:** 11.a In your view and from your experience in managing/working in healthcare organisations, what are the sort of capabilities or attributes that you think can enable your hospital to adapt, and respond to each/all of the various changes discussed earlier and, thus, thrive in an environment of continuous and unpredictable change? (Probe in terms of: organisation structure; culture, technology, leadership)

_____________________________________________________________________

Question 12: - The following is a copy of the preliminary original model developed by the research project, which aims at creating organisational agility as a means of dealing with continuous and unpredictable change. (Provide a copy for each respondent)

- What are your comments and thoughts regarding the factors/capabilities outlined as creating organisational agility?

- Are there any factors or capabilities or practices that you think should be included or modified?
