Welcome to ICSEI 2016!

The University of Glasgow, founded in 1451, is proud to host the International Congress for School Effectiveness and Improvement 2016. The ICSEI Board and Local Organising Committee warmly welcome you.

This historic congress is the first to be held in Scotland in ICSEI’s history. As a nation, Scotland has a long history of valuing education. From John Knox’s ‘school in every parish’, through philanthropist Robert Owen’s pioneering work linking education and employability, to today’s policy focus on social justice, Scotland has always been at the forefront of educational change and improvement. Notwithstanding our unique contexts, our belief in the pivotal role of education unites us. It is in this spirit that we are delighted to welcome more than 500 delegates from across the globe to contribute to these seminal discussions on school effectiveness and improvement.

The conference theme for ICSEI 2016 – ‘Connecting teachers, schools and systems: creating the conditions for effective learning’ – emphasises the importance of teachers, schools and systems as critical elements in efforts to ensure effective learning and foster sustained improvement. The ICSEI conference offers a unique forum to debate, network and collaborate through keynote sessions, symposia and individual papers.

During the conference, you will be able to enjoy Glasgow’s rich culture and heritage and enjoy contributions from highly talented musicians and young people from Glasgow’s schools.

With so much to choose from, we hope you will appreciate both the academic stimulation and social activity that the ICSEI 2016 conference has to offer.

President’s Message

Welcome to ICSEI 2016 in beautiful Glasgow! With its long-term heritage in educational reform, Scotland is an ideal location for ICSEI 2016. ‘Connecting teachers, schools and systems’, the Congress title, is not only the precondition for ‘Creating the conditions for effective learning’, but also a particular reason for bringing ICSEI to Glasgow. Scotland has a unique tradition in successfully linking education policy, research and practice, guided by a fundamental trust in educators and the teaching profession, as well as a robust concern for children and youth.

I especially want to welcome researchers, policy makers and practitioners from around the globe who have gathered at this event to use it as a forum for sharing their knowledge and experience, each motivated by a vigorous commitment to improving educational opportunities for all. This is never an easy or smooth process, particularly in light of the rapidly changing face of our global world. Democratic values, beliefs and practices are at stake and are at the heart of this discourse. The Congress offers a multitude of opportunities to question how schools, as well as education systems, position the future in the decisions they take today regarding an unknown future.

Keynotes, symposia and paper sessions offer information on latest research and professional experience; showcases give insights into whole system reform and the challenge of linking policy, research and practice to feed systems forward to a desirable future. Membership in one of ICSEI’s networks enables mutual exchange beyond the Congress.

Because of its unique history in education and the pioneering activity taking place across schools in Scotland today, this conference has the potential to offer a space for prototyping schooling towards a future worthy of our hopes and aspirations for tomorrow, as jointly we bring together a wealth of complementary expertise in school effectiveness and improvement, in research, policy and practice.

Thank you to the Glasgow team for putting together a wonderful programme that opens up countless learning possibilities for each of us as individuals and for all of us as a community, that enables networks to grow and gain even greater reach and momentum, and that allows for knowledge to be shared, challenged and valued so that it may eventually drive next practice.

Professor Graham Donaldson CB
The Improvement Trap

In the opening keynote for ICSEI 2016, Graham Donaldson will draw from his recent reports *Teaching Scotland’s Future and Successful Futures (Wales)* to explore how the nature and pace of social and economic change has profound implications for the curriculum and the ways in which the improvement agenda still tends to stifle deep innovation.

Formerly Chief Executive of HM Inspectorate of Education and Chief Professional Adviser to the Scottish Government on all aspects of education outside the university sector, Graham is now a professor in the School of Education, University of Glasgow. He was made a Companion of the Most Honourable Order of the Bath (CB) for his services to education in the 2009.

Dr Rowena Arshad OBE
Effective Schools Need to Engage with Street Stories

Sharing the platform for the opening keynote address, Dr Rowena Arshad will build on Graham Donaldson’s critique to focus on what effective learning might look like to ensure the inclusion of diverse young people, exploring what is missing, what needs to be reframed, what needs debunked and the responsibility each educator has in their various levels and position in pushing for improvement with soul.

Rowena is currently the Dean at Moray House School of Education, University of Edinburgh. She is also a Co-Director of the Centre for Education for Racial Equality in Scotland (CERES). Rowena has served on many government committees and advisory panels both in Scotland and in the UK over the past 25 years. She was made an Officer of the Order of the British Empire (OBE) in 2001 for services to race equality.

Professor Allan Walker, Hong Kong Institute of Education
Two Buckets in a Well: Searching for Conditions of Success in Chinese Schools

In his keynote address, Allan Walker explores some of the mysteries he has encountered while trying to understand the successes of China’s education system. Examining these mysteries in context shows that many of the oft-criticised societal and educational conditions in China come together to produce impressive student outcomes. This suggests that the same learning conditions have different effects both within and across contexts – there are two sides to every coin.

Allan Walker holds the Joseph Lau Chair Professor of International Educational Leadership at The Hong Kong Institute of Education. Allan has been at the forefront of a group of scholars investigating how school leadership is framed and enacted in different contexts and cultures internationally, and using this knowledge to broaden understanding and build leader capacity.

He is known internationally for his passion for school leadership, innovative approaches to leader development and the promotion of leader control and accountability for their own professional learning.
Community schools are hubs of human capital that aim to ensure that all students can come to the classroom prepared to learn, and leave the classroom prepared to navigate the outside world as conscious, global citizens.

By tackling the systemic barriers that impede learning and school readiness, community schools serve to address inequity in education and address the needs of the “whole child” through extended learning opportunities, family and community engagement, and support services.

Functioning as both a community development and educational attainment strategy and “home” to students and families, community schools are fast becoming the place where children and families “learn to fish”, within a vast social support network designed to support the needs and dreams of every child.

This talk will lead participants through the web of experiences that shape one community school campus in New York City’s Washington Heights neighbourhood, using storytelling that highlights strategy, trends and the emerging needs and opportunities of this learning community.

Marieneves Alba is Director of Arts Programs, Community School Director, Mirabal Sisters Campus, The Children’s Aid Society in New York. She is an activist, educator, writer, and media professional whose work spans print, radio, and documentary film-making. She is a Co-Founder and Director of the International Hip-Hop Exchange (IHX) and uses Hip-Hop culture to engage young people in social justice education and promote activism and social responsibility among Hip Hop-identified youth.

Her work as a researcher and activist has informed her travels and independent research projects in Brazil, Cuba, Mexico and South Africa.

Pasi Sahlberg is a Finnish educator, author and scholar. He has worked as a schoolteacher, teacher educator, researcher and policy advisor in Finland and has studied education systems and reforms around the world.

His expertise includes school improvement, international education issues, classroom teaching and learning, and school leadership. His best-selling book, Finnish Lessons 2.0: What can the world learn from educational change in Finland, won the 2013 Grawemeyer Award.

He is a former Director General of CIMO (Centre for International Mobility and Co-operation) at Finland’s Ministry of Education and Culture in Helsinki and is currently a visiting Professor of Practice at Harvard University’s Graduate School of Education in Cambridge, MA, USA.

International student assessments have created new forces for change that influence teaching and learning in schools around the world.

This presentation explains the origin of two most distinct educational change movements today and describes how they mould school improvement efforts in Scotland and beyond.

In conclusion we need to encourage schools and teachers to explore alternative ways to improve their schools than those offered within global educational reform movement today.

ICSEI Networks and pre-conference

ICSEI has five active networks: Educational Leadership, MoRE, Data Use, 3P, and Early Childhood and Care. These networks consist of groups within ICSEI who were already forming and holding events between regular annual meetings. At each ICSEI conference, these networks hold membership meetings (open to all ICSEI conference participants) and organise a pre-conference and symposia. Their symposia often involve members from a number of countries focusing on the network area of interest. The network members engage in ongoing communication in between conferences.

THEME OF THE PRE-CONFERENCE AND PROGRAMME

The central theme of the pre-conference is networking. For those of you who do not know the ICSEI networks, we invite you to come to the pre-conference to get to know the networks and their members. For those of you who do know the networks and/or are a member of one or more of the networks, use this opportunity to discuss current issues in your field with fellow researchers, practitioners and policy makers.

At the pre-conference, each network will introduce themselves briefly and will put forward a question or issue from their field for discussion. The Early Childhood Education and Care Network will focus on research on, and practical experiences of, supporting children’s transitions from an EC-setting to school. The Data Use Network will focus on initiatives of (local) governments to support data use. The MoRE Network will focus on how to assess effectiveness in the real world and how to master methodological pitfalls when it comes to complexity and complicatedness. The Educational Leadership Network will discuss the themes of leadership development as well as connecting leadership with system learning and school improvement. The 3P Network will consider how policy makers, practitioners and researchers, working as intermediaries, both locally and globally, can more effectively make a contribution to improve outcomes for communities in general and children and youth in particular.

After this plenary introduction, we will break out into round-table sessions. Each network will lead one round table. At these tables, you can get to know the networks and engage in an in-depth discussion on the issue or question put forward by the network. After the round table sessions, the pre-conference will conclude with closing remarks from our ICSEI President Professor Dr Michael Schratz.

SCHEDULE OF THE PRE-CONFERENCE

09.00-09.30: Introduction of all the networks and the issue or question they would like to put forward

09.30-10.45: Round-table session to get to know the networks further and to discuss the issue or question raised by the network

10.45-11.00: Closing remarks by the ICSEI President Professor Dr Michael Schratz.

THE FIVE ICSEI NETWORKS

The Educational Leadership Network is for leaders at all levels: in practice, policy and research. The focus is on sharing and advancing the creation of knowledge in the field of educational leadership, drawing on perspectives from around the globe. The network includes members from all over the world. The Educational Leadership Network currently strives to examine how educational leadership aimed at school effectiveness and strengthening the quality of teaching and learning is enacted and studied in various country contexts. From this work, the aim is to identify emerging themes of interest in the field of educational leadership in and around schools for policy, practice, and research.

The Methods of Researching Educational Effectiveness (MoRE Network) focuses on the following: presenting and interpreting...
results of empirical studies in educational effectiveness; exchanging ideas for research in educational effectiveness and evaluation of improvement programmes; developing research proposals for studies in educational effectiveness, especially international comparative studies; discussing problems encountered in educational effectiveness research and identifying possible solutions; identifying new research methods for issues unique to educational effectiveness; and contributing to the establishment of a databank of research instruments used in educational effectiveness studies.

The Data Use Network brings together researchers, policy makers and practitioners working in the field of data-based decision making. The focus is on the use of data, such as assessments, observations, and surveys, to improve education at school, classroom, and individual student level. Important topics for the network are: aspects of policy or practice with regard to data use that have positive impacts in contexts in different countries; factors that hinder or enable the use of data; effects and side effects of data use; defining effective data use (i.e., what does data use in different countries look like); support of schools in the use of data; characteristics of effective professional development in the use of data.

Practitioners (teachers, principals, administrators, consultants, trainers) have often worked in isolation, but collaboration is required between policymakers, politicians and practitioners, which is the focus of the 3P Network. The key is to focus on building capacity so that as local educational and children’s services policy is developed, it really stimulates and facilitates school improvement, and school improvement becomes integrated into the broader construct of health, wellbeing, community and lifelong learning. The 3P Network is a professional practice and research network for all those professionals engaged in the policy determination, planning and delivery of educational and other services to children, young people and families.

The Early Childhood Education and Care (ECEC) Network consists of a conglomerate of practitioners, researchers and policy makers having attended ICSEI since the beginning of the network in 2008. Globally, there’s an increased focus on the economic as well as human benefits of children attending quality ECEC institutions at a young age. The degree of expansion varies tremendously leaving room for co-national learning. The ECEC Network serves as a platform for getting quick access to and exchanging knowledge about the rapid development of early childhood education and care around the world, and especially in the countries that network members represent. Since most members are unable to attend the congress on a regular term, the network is updated once a year and congress participants working with ECEC matters are mostly welcome to join the network.

Session formats

Symposia. A symposium provides an opportunity to examine specific research issues, problems, or topics from a variety of perspectives.

They may present alternative solutions, interpretations, or contrasting points of view on a specific subject or in relation to a common theme.

Often they feature a panel discussion format targeted at a clearly delineated research issue or idea.

Frequently interactive, a large portion of the sessions may be devoted to dialogue among the presenters and discussants; questions and discussion among all those present; or small-group interaction.

Round-table sessions provide an opportunity to discuss and debate a range of perspectives linked to one of the conference themes.

Paper sessions. In this format, authors present abbreviated versions of their papers, followed by comments/critique and audience discussion.

Each paper session will be chaired by a member of the local organising committee. A typical structure for a
A session with three or four papers is approximately five minutes for the chair’s introduction, 15-20 minutes per author presentation, 5-10 minutes for critique, and 15 minutes for discussion.

Session chairs may adjust the timing based on the number of presentations scheduled for the session.

Presenters need to be attentive to the time allotted for presenting their work. In the case of papers with multiple authors, more than one person may present. Again, presenters are urged to pay attention to the total time available to them so that no one speaker detracts from the overall presentation or keeps others from presenting their work by going over their allotted time.

Poster sessions combine graphic display of materials with the opportunity for individualised, informal discussion of the research. Individual presenters set up displays representing their papers in a large area with other presenters. There are two designated times in the programme for poster sessions.

Innovate! sessions provide an opportunity to showcase innovative and creative approaches to practice. Innovate! sessions last 30 minutes.

Spotlights. Each year, we highlight one or two of the many countries that comprise ICSEI, wherein participants attending from that country can focus on its national educational achievements and issues. This year we are featuring Ontario, Canada – host of ICSEI 2017 – and Austria.
Our mission:
ICSEI is a movement focused on the quality and equity opportunities and challenges related to school effectiveness and school improvement.
International Congress for School Effectiveness and Improvement

Membership

History and purpose

In 1988, an informal meeting was organised so that people in different countries could come together to learn from the strengths of school effectiveness research and improvement efforts internationally. More than 120 educators came to the first meeting in London in January 1988 and adopted a draft constitution pledging to work in different countries for excellence and equity in schools.

ICSEI’s purpose continues to provide a truly international forum for researchers, school and district leaders, teachers, local and national policy makers and politicians, NGO personnel and consultants, who come together to share ideas, promote research, and encourage practices that will enhance the quality and equity of education for all young people.

Membership benefits

Joining ICSEI enables members to become part of a dynamic network that focuses on exploring ways of improving schools for students, for those who teach them and for the adults who lead them. Members contribute to a strong and influential research tradition.

Other membership benefits include:

- discounted rates for annual Conference and access to Conference proceedings during and after Conference
- discounted rates for those who wish to subscribe to the internationally acclaimed journal School Effectiveness and School Improvement
- access to ICSEI’s newsletter ICSEI Digest and Express. This newsletter is distributed three times a year and includes articles from the previous and upcoming conferences, as well as articles focusing on topical issues that are affecting young people. Each article is peer reviewed and each Digest includes up to four such articles
- a number of forums and learning opportunities that are accessed through the members’ only sections of the ICSEI website
- a selection of international specialist networks that provide forums and blogs on now, new and next issues and opportunities.

ICSEI Networks

ICSEI Networks provide an international forum for the exchange of information and dialogue on critical issues through active discussion among researchers, practitioners and policy makers both online and at ICSEI Conference.

ICSEI members are encouraged to join ICSEI Networks to strengthen and facilitate the sharing of thoughts, experiences, challenges and the building of professional learning communities between researchers, practitioners and policy makers.

During annual Conference, each Network hosts a business meeting, pre-Conference workshops, and supports the presentation of papers and symposiums specific to their focus area.

Current Networks include:

Methods of Researching Educational Effectiveness Network

The Methods of Researching Educational Effectiveness (MoRE) Network began at ICSEI 2006 in Barcelona. The MoRE Network focuses on:

- presenting and interpreting results of empirical studies in educational effectiveness
- exchanging ideas for research in effectiveness and evaluation of improvement programmes
- developing research proposals for studies in educational effectiveness, especially international comparative studies
- discussing problems encountered in educational effectiveness research and identifying possible solutions
- identifying new research methods for issues unique to educational effectiveness
- contributing to the establishment of a data-bank of research instruments used in educational effectiveness studies.

The 3P Network

ICSEI established the 3P Network to serve as a professional practice and research network for those engaged in the policy determination, planning and delivery of services to children and young people. Its focus is to promote the professional development and competence of all working in the strategic management and operational delivery of education and children’s services at local authority

level and, through this, increase the effectiveness of that sector of provision that sits between national government and schools.

Policymakers, politicians and practitioners who set policy and determine provision, provide training, consultancy, guidance and advice to systems, schools, networks and stakeholder organisations meet to consider specific “hot issues” of the day and through:

• exchanging and reflecting on professional practice
• developing a collective intelligence base
• providing the impetus for research into local authority capacity building.

The Educational Leadership Network

The Educational Leadership Network is for all leaders at all levels in education systems and MOEs. Its focus is to advance the creation of knowledge of leadership in practice, policy and research. The Network was initiated in 2006 at the ICSEI Conference in Barcelona.

The Educational Leadership Network hosts an online forum where any ICSEI members can contribute, initiate or read current topics being discussed. Members are encouraged to support the activities of the Educational Leadership Network at annual Conference and online.

The Data Use Network

The main goal of this network is to share knowledge on data use to improve data-driven decision making practices in schools globally. By sharing knowledge, all can learn from each other instead of constantly “reinventing the wheel”. This sharing of knowledge takes place at conferences including ICSEI and AERA, by means of the ICSEI website, and by other communication devices (e.g. email, contact between members). Other activities include:

• developing a special issue for the Journal School Effectiveness and School improvement entitled Data-driven decision making around the world: From policy to practice to results
• developing an edited volume on data use with contributions from international researchers to be published by Springer entitled Data-driven decision making in education: challenges and opportunities
• establishing an international comparative study on data use in education focusing on: how schools use data; what types of data are being used and being needed by schools; which factors hinder and support effective data use, and what are the intended and unintended effects of data use
• participation in an international EU project on using data for improving school and student performance: www.datauseproject.eu

The Early Childhood Education Network

Members of the ECE Network come from many countries to actively discuss common dilemmas around ECE and to work to improve ECE locally and globally.

As well as exchanging knowledge related to different interests and perspectives, the Network also focuses on:

• collaborations on proposals and papers for ICSEI symposiums
• conference announcements on other relevant ECE conferences
• references to reviewed links, research and reports on ECE

Various themes of interest including:

• evaluation and assessment practices
• sustainable improvement, paradoxes and dilemmas
• policy development and implementation
• interdisciplinary work across sectors
• collaboration with parents
• children’s perspectives in research and practices
• children’s right to education
• language, math and literacy fluency
• gender
• cognitive skills and brain research
• the relation between play and learning.

ICSEI 2017 will be held in Ottawa, Ontario, Canada. The theme for ICSEI 2017 is ‘Collaborative Partnerships for System-Wide Educational Improvement’. This theme gives prominence to the importance of partnerships between and among the various participants in international education systems – students, parents, communities, schools, districts, government and academics – to inform and impact student learning, practitioner professional learning, and system leadership. Keynote speakers will offer international and local perspectives on systems effectiveness, including successes and challenges along the pathway to improvement. Come enjoy ICSEI 2017 in Canada’s capital – the most educated city in the country!
