Diabetic foot ulcers

How do I choose a Dressing?

Veronica Newton
Senior Lecturer in Podiatry

Wound Conference
14th June 2012
Session outline

- DFU: what’s our destination?
- Identifying the problem – DFU: dressing selection
- Challenges in DFU care
- Aligning the policy and guidelines
- Aim: Offer a wound decision model to map decision making when choosing dressings for DFU’s.
Destination: London
How do I get there?

- Car
- Train
- Plane
DFU – Destination: wound healing how do I get there?

- Patient
- Arterial Disease
- Infection
- Neuropathy
- Lifestyle
- Compliance
- Footwear
- Tissue viability
The problem: Patient attends with a foot wound....

What do you do?
DFU: dressing?

- Gauze and saline?
Dressings for Diabetic Foot Ulcers

(Armstrong 1998)
DFU: What dressing will you prescribe?

- Antimicrobial
- Tulle
- Foam
- Alginate
- Hydrocolloid
- Hydrogel
- Film
- Collagen derived
- Polyacrylate
Practitioner toolkit for dressing selection

- care pathway
- experience
- Cost
- Availability
- Service Provider
- formulary
- Research (Farndon 2009)
- Policy & guidelines
- outcomes
Back to basics: why are dressings prescribed?

- Reduce pain
- Improve mobility
- Assist healing
- Improve quality of life
- Reduce infection

Not all wounds respond the same if given same dressing prescription....
What are the Issues for dressing DFU’S

**Areas of agreement**
- Promote healing
- Protection
- Reduce infection
- Optimal healing environment
- Reduce pain
- Comfortable
- Easy to apply

**Areas for improvement**
- Dressing prescription
- Rationale for dressing
- Frequency of review
- Patient Advice
- Outcomes

*huge variation in services*
Choosing Quality in DFU care:

- dressing
- Reduced Pain
- Quality of life
- Improve mobility
- Eliminate infection
- Assist healing

= patient centred outcomes

(Equity and Excellence Liberating the NHS DH 2010)

- Clinical governance

“...framework through which NHS organisations are accountable for continually improving the quality of their services and safeguarding high standards of care, by creating an environment in which excellence in clinical care will flourish “

(Scally 1998)
Developing a **Woundcare Decision Making Model**

- Structured model to record and document evidence which supports the stages of decision making for dressing provision.
- Maintain practitioner autonomy whilst providing a clear map for decision making.
- Capture multiple factors impacting on success of wound care management.
Why do we need WDM model?

- Benchmarking
- Audit
- Standardise
- Evaluation
- Service improvements
- meets Professional body requirements.
Get help from Diabetes guidelines

- International working group on the diabetic foot (IWGDF) 2007 [www.iwgdf.org](http://www.iwgdf.org)

- SIGN 116

- Diabetes UK (2009): ‘Putting feet first: commissioning specialist services for the management and prevention of diabetic foot disease in hospitals

- DH (2011) NICE CG119 Diabetic foot - inpatient management of people with diabetic foot ulcers and infection
Get help from Wounds literature

- European wound management association – EWMA

Position documents

- European Pressure Ulcer Advisory Panel – pressure ulcer grades and classification system (grade 1-4)

- Wagner classification system (grades 1-5)

- Texas classification system (Armstrong 1998)
DFU: Assembling the key components

- Evidence in wound care
- Practitioner skill
- Clinical guidelines
- Health policy
- Cost, time, outcomes
- Centred around the patient
Wound care decision making

- The patient
- The wound
- The dressing
DFU: dressing decision making

- **P, W, D**
  - Patient, overall goal, disease state, compliance, activity, pain.
  - Wound, assessments, local, systemic factors impacting on healing, referral.
  - Dressing, identify aims short and long term and practical application, frequency of use, footwear.
WDM and DFU: How will it help?

- Use Standardised WDM format
- Has application for Novice or Experienced practitioner
- Records critical decision making skills
- Offers archived evidence
- Point of reflection for constant dynamic improvement.
Where does WDM fit in NHS?

EBP relies on availability of research and the ability of practitioners to use it appropriately.

Developing strong evidence for the ideal dressing is a serious problem in DFU management.

NHS policy Services need to produce patient outcomes data.
Take home message:
Aspire for Quality in decision making for dressing selection.

- Ask your team the following question:

- Do we have a standardised, transparent, profiled, auditable approach to dressing selection?
+ Destination: woundcare happiness....
