This presentation...

- ...addresses the issue of organisational learning and how organisations have difficulties in learning from their employees
- ...draws upon data gathered from three groups of managers on three different academic programmes
- ...discusses the challenges and solutions to organisational diffusion following thematic analysis of the data examples

Organisational Learning

Traditionally organisational learning occurs in the following ways:

- On the job
- Training courses
- Harvard method... didactic and case based

Barriers to Organisational Learning

- Perpetuation of the same approach and thinking... Fixed mental models
- Encourages one right way... Based on hierarchy and possession of power
- Questioning signals descent

Action Learning

Action Learning is based upon **small groups** of colleagues meeting regularly over time to **address**, via specific questioning techniques, **real problems and issues** in order to get things done; **reflecting and learning** with and from their experiences, and from each other, as they attempt to **change** things

Questioning Techniques (Revans, 1982)

- What am I trying to do?
- What is stopping me from doing it?
- What can I do about it?
- Who knows what I am trying to do?
- Who cares about what I am trying to do?
- Who else can do anything to help?

Insightful Questions

(McGill & Brockbank, 2006)

- Questions to help find or make meaning
- Questions that cause others to reflect and learn from the past
- Caring and supporting questions
- Questions seeking examples or practical illustrations what sort of things are you talking about?
- Questions that cause people to think about the future and the consequences of action
- Questions about initiating Action
- Balancing, integrating, summarising and moving on questions

Research Sample

Data gathered over the last two years from various managers on academic programmes, which included:

- DBA
- MBA
- MSc Healthcare Management

Data Collection

- DBA
 - Focus groups
 - Impact statements
- MBA
 - Questionnaires
- MSc
 - Organisational reports

Thematic Analysis &
Content Analysis

Findings – Challenges for Diffusion

- Hierarchy: ceiling on decision making and involvement
- Culture: discouraging questions
- Fear of sharing knowledge: knowledge is power and control
- Avoidance of knowledge dissemination

Findings - Solutions

- Building a culture that values reflection
- Building an enquiry based culture that looks for right questions as well as right answers
- Seeing both failure and success as learning opportunities... No fear of repercussion
- Modelling positive behaviour... To support the above interventions

Conclusion

The process of Action Learning assists in challenging the status quo... whereby promoting change through knowledge transfer
