User centered design for medical products
Acknowledgements

Special thanks to:
• Prof. David Leaper
• Jo Harris
• Little Heroes Cancer Trust
• Helen Turner
• Maureen Jackson
• Melissa Fletcher
• Ruth Clare

The research was originally presented at The Textile Institute World Conference 2016: Textiles inseparable from the human environment, 25-28th April Poznan, Poland, and due acknowledgement should be given to the conference proceedings - ISBN 978-83-928618-5-0.

Background

• Local charity – real world problem
• Cancer in childhood is rare
• Intensive chemotherapy – central venous catheters (lines)
• Tunneled under skin, external opening on chest

Problem

• Risk of displacement
• Accidental complete removal
• Children may wish to conceal them
• Discomfort during sleep
• Lines may dangle

Challenge

Harness to improve well-being of children with cancer
Research Plan

• Interdisciplinary team Dr J Power, Prof D Leaper, J Harris
• Local cancer charity Little Heroes
• Student researcher (teaching/research nexus)

Philosophical Approach - constructive interpretivism

• Balance – academic enquiry and practical application
• Resolve epistemological and methodological differences
• Timeframe – interpretivist approach was adopted

Data collection techniques

• Market research / product research / standards
• Focus group / interviewed medical personnel
• Product analysis
• Synthesized the findings using a QFD
A method of translating customer needs into appropriate technical requirements

Parents / carers
• Location of harness (comfort)
• Design function (functional)
• Health and Safety (various)
• Style line (aesthetics)

Comfort wear trial – current products

Priority; Comfort (fit), function, H&S, styleline
Harness to improve well-being of children with cancer

- Ergonomically designed
- Comfort / functionality/ dignity
- Stylish
- Antibacterial

The harness is now being commercialised under the Tookie brand (http://www.tookie.co/)
Any Questions?

Project Lead: Dr. Jess Power
