Blurring the boundaries between our physical and electronic libraries

emtac conference
Andrew Walsh, April 2010

The next 20 minutes

- .Why 'blur the boundaries'
- .Locating technologies
- .'Smarter' objects
- .RFID for more than just circulation

Why? A little bit of magic

Inspiring tomorrow's professionals

Why? To keep our physical libraries...

Are we becoming glorified computer labs and meeting places?

Quick question!

Do you think your physical library directly impacts on student achievement?

YES/NO

Why? To keep our physical libraries...

Library Usage v Final Award – All Honours Courses

What is the physical library for?

Inspiring tomorrow's professionals

Personalising the library environment

- .Typical 'mobile friendly' library services
- .Podcasts; SMS services; Mobile friendly web pages
- .What about the user moving through the library?
- .Annotating the physical resources;
- .Augmenting the physical reality;
- .And more....

Inspiring tomorrow's professionals

Locating technologies

- . GPS
- . WIFI / Bluetooth / Active RFID Triangulation

“...in large indoor environments such as libraries ... location awareness can become a crucial determinant of superior quality of service, deriving from the ability to locate the co-ordinates of a person or an object with reasonable accuracy at all time, and this provide spatially-aware services.”

Giaglis et al (2002) *On the potential use of mobile positioning technologies in indoor environments*. In: *ereality:constructing the eEconomy*, pp. 413-428. Bled: Slovenia

'Smarter' objects?

- QR codes and similar
- RFID tags

QR codes

Inspiring tomorrow's professionals

QR codes

Inspiring tomorrow's professionals

QR codes

University of
HUDDERSFIELD

Inspiring tomorrow's professionals

Awareness of QR codes

.Before we started – 8% recognised a QR code

.After a full academic term – 22% recognised one.
(but another 11% volunteered they were familiar...)

RFID Tags

In our library, they're in:

- Every book
- Every DVD / Video
- In fact, almost all stock
- AND - every library card

But all we use them for is stock control and print credit.

RFID tags

Could be used for....

- Book recommendations
- Comments on books
- Recommend this book to others
- Personalised help
- Social Networking
- Directed messages from the University

Summary

So how can we bring that little bit of magic into the library?

- Could use software on handheld devices to locate users.
- Could use QR codes, or RFID tags to interact with users as they move around.

“Research which sought to make full use of all cell phone hardware and software capabilities in tandem would be creating a service which did not have a true analog in the physical library ... The development of such a platform provides the library with a way to be an instrumental part of the students' life.”

Hahn, J. (2008) Mobile learning for the 21st Century Librarian. *Reference Services Review*, 36(3), pp. 272-288.
