# Ready for the real world?

Paul Dagg,  
University of Huddersfield  
Beverley Crosland,  
Calderdale and Huddersfield NHS Trust  
Janet Hargreaves,  
University of Huddersfield

# Who are we?

HEFCE funded ALPS-CETL 2005-2010

Yorkshire and Humber Strategic Health Authority, gave  
'follow on' Funding for networks to develop ALPS outputs  
(including this one).

We started with a problem...

...

how do we assure our students  
are *competent* to practice?

So we developed CIPA,  
an online, interactive  
self-assessment tool.

We realised we had another problem...

...

how do we assure our students are  
*prepared* for practice?

So we developed P-PA,  
also an online, interactive  
self-assessment tool.

# What is P-PA?

Preparation for Practice Assessment  
(*pron. PIPPA*)

An online self assessment tool for students,  
tutors/mentors and qualified professionals

This is the story of how we developed it...

# P-PA was a collaboration between:

Students from Health and Social Care, Computing,  
Business; Health and Social Care academics;  
Health professionals and technologists  
(including me!)

## How we assembled the team:

Janet led the project;  
Students recruited through University;  
Interested professionals  
from both health and social care and disability  
services;  
Technology provided by the  
Learning Technology Support Unit.

## We used an action learning design:

Knowledge is produced as a collaborative activity between the researcher and participants (Park 2001);

Participant act as lay experts in their own field  
(Masters 1995);

Outputs of action learning design benefit both researchers and participants.

# We held a series of workshops:

Knowledge elicitation;  
Placement experience:

*As participant, as provider/supervisor, as administrator;*

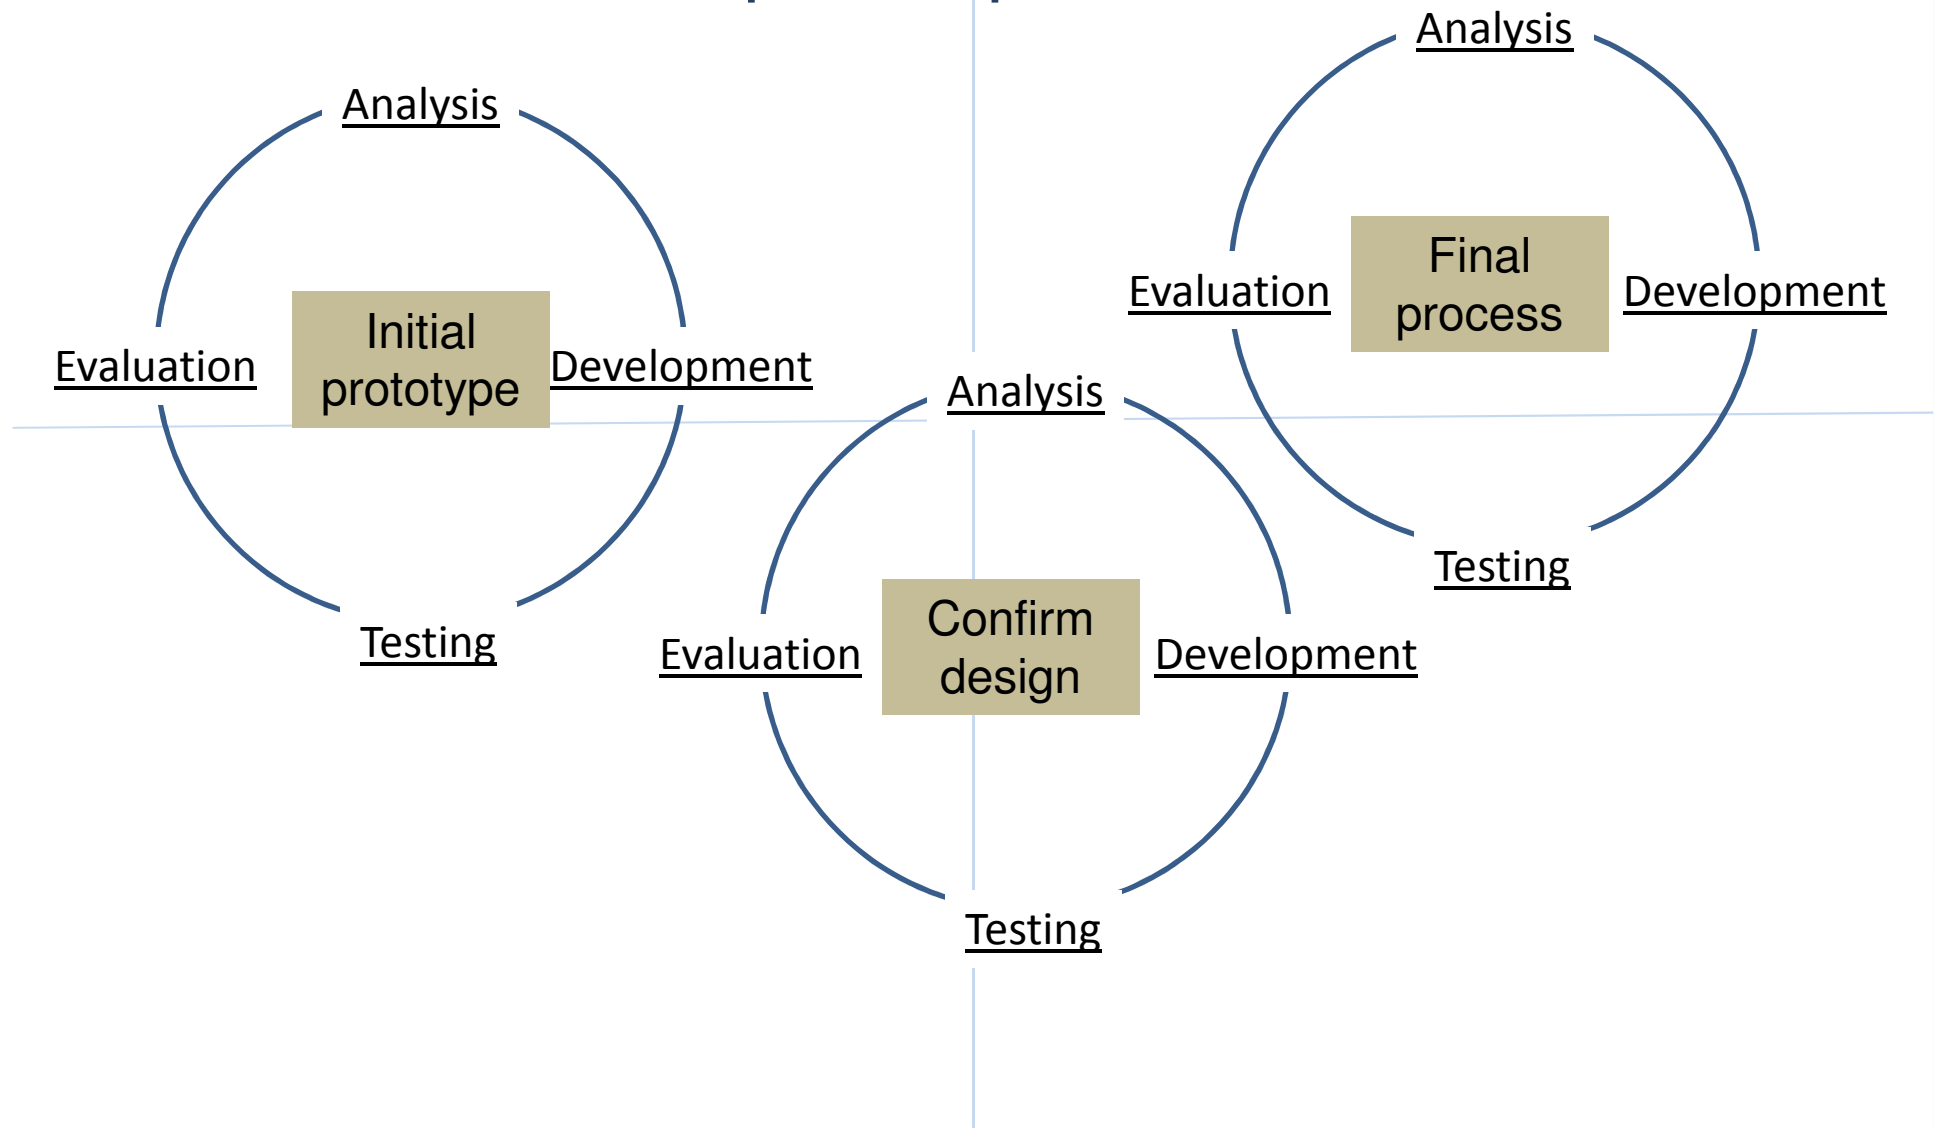

Formulate questions/find answers/develop resources.

## Benefits of Action Research Methodology:

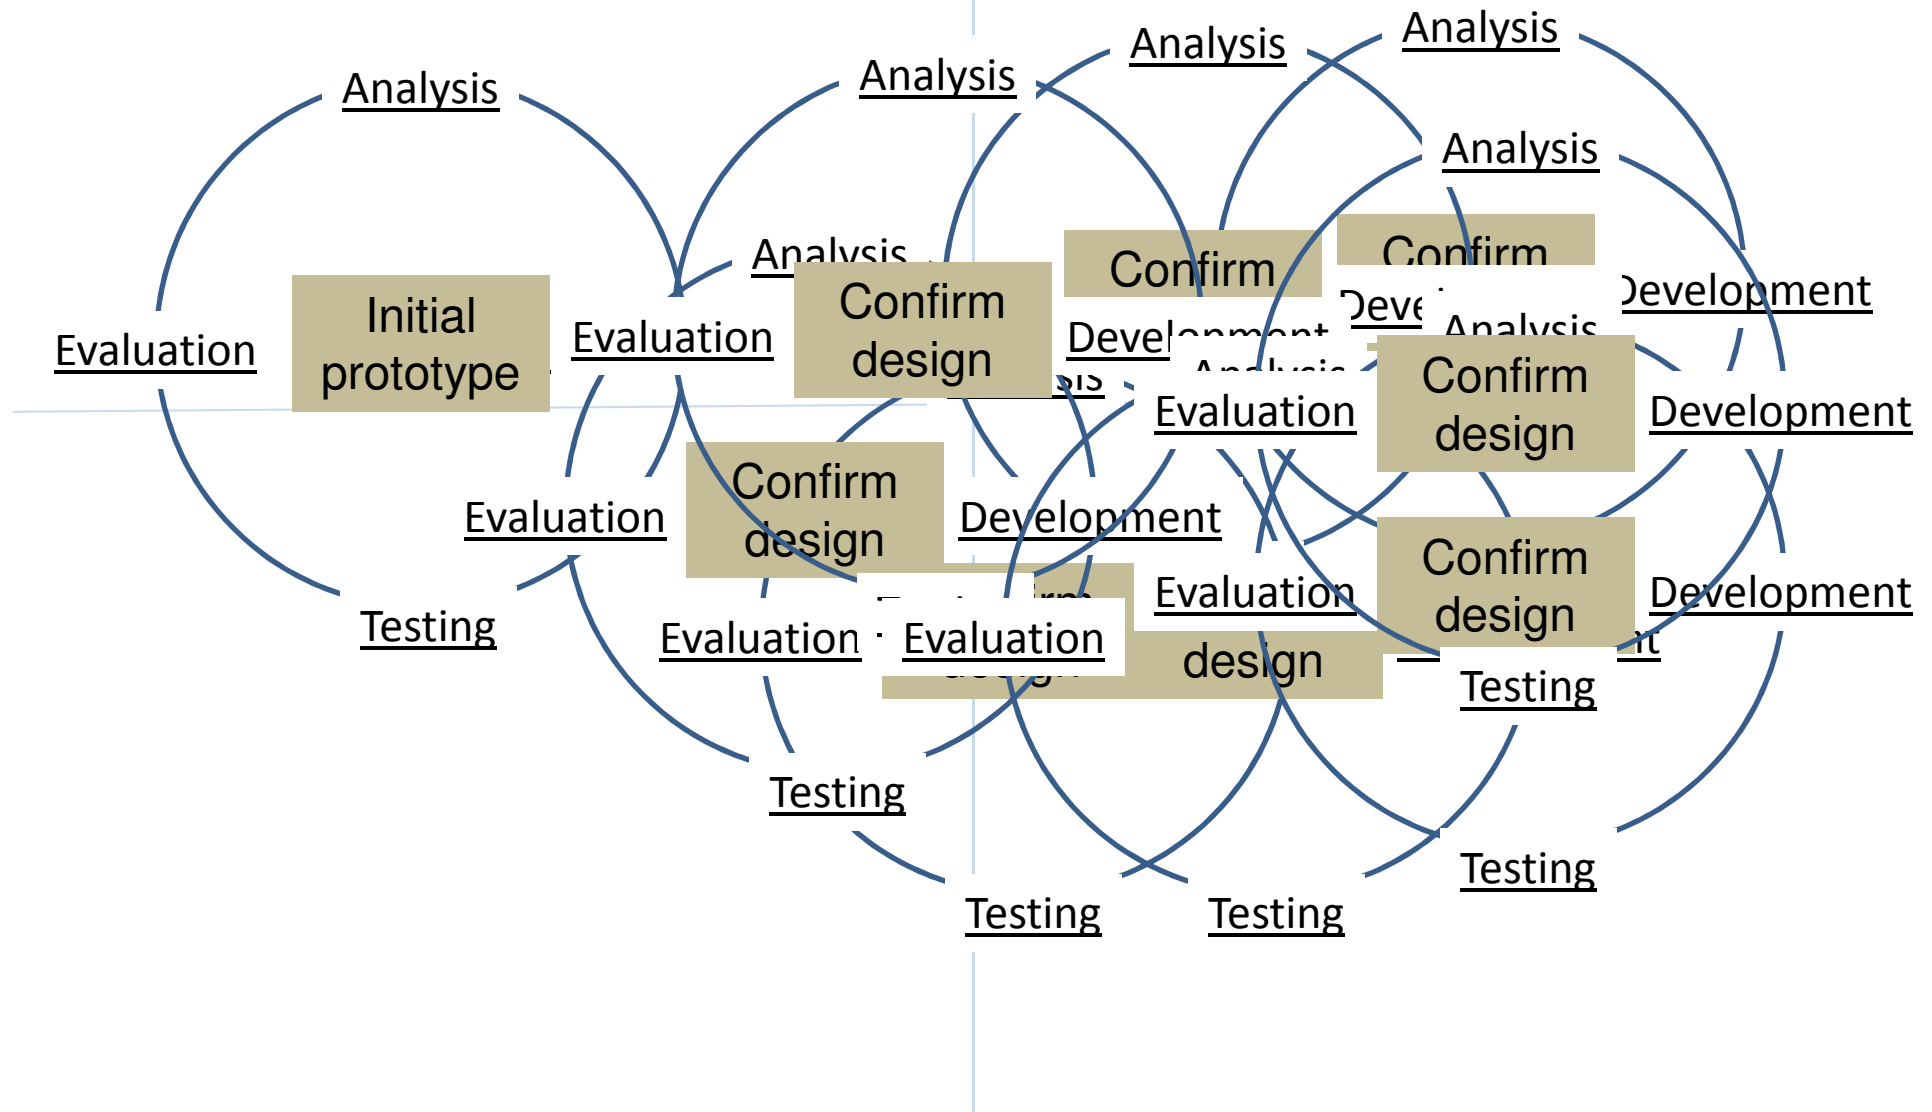

Multimedia development is an iterative process.

## Multimedia development process:

# Multimedia development goes wrong process:

# Benefits of Action Research Methodology:

Developers embedded in the team:

- Understand the context;
- suggest technologies;
- interpret proposals;
- advise on practicalities.

## So what have we built?

A “preparedness” inventory;  
interactive:

*certain answers trigger additional questionnaire;*

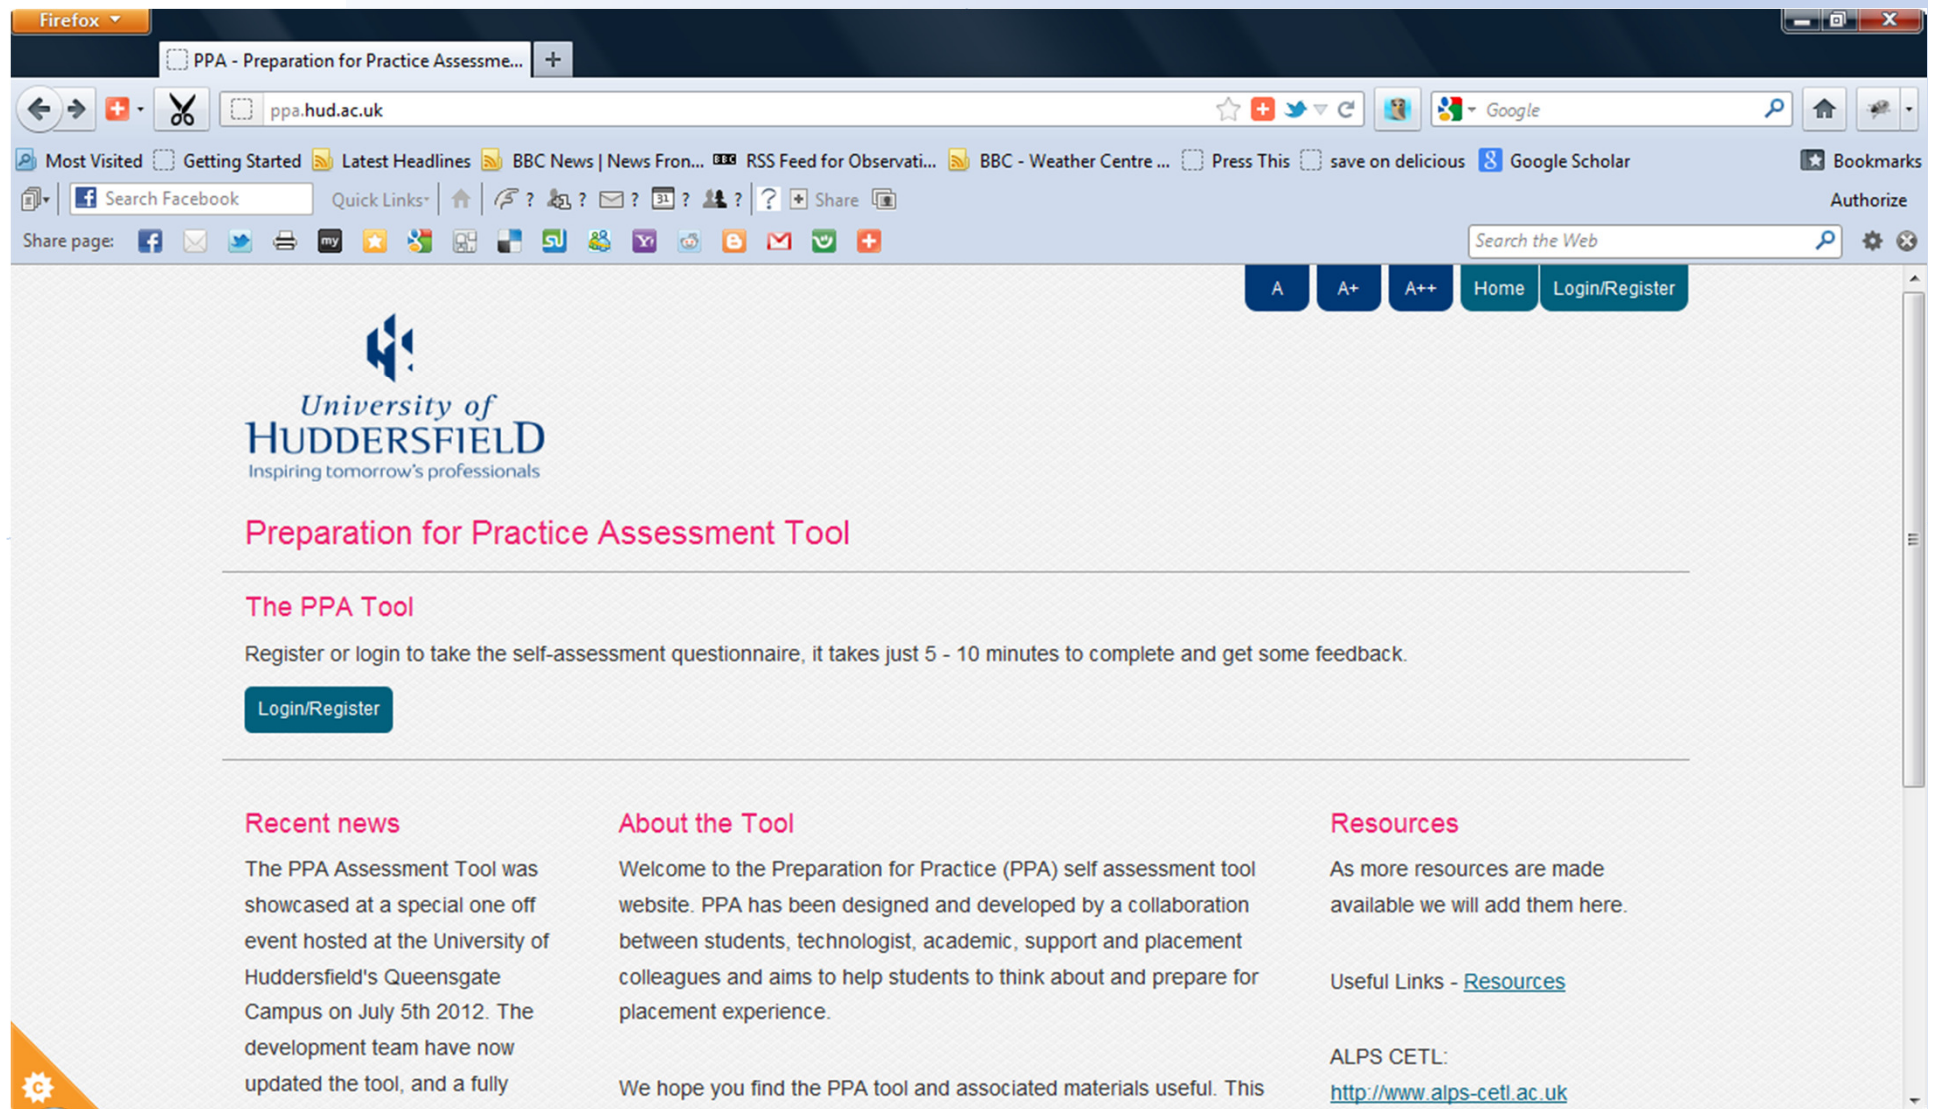

personalised feedback:

*feedback can be saved as PDF for discussion/reflection;*

Links to useful resources and information.

Alert placement administrators/educators?

[illegible]

### Section Two Instruction

Your answers to the questions in section one shows that areas that are not about your skills and knowledge may be a problem for you. These areas of personal commitments or needs may include on or more of the following.

- o Your own responsibilities to adults or children you care for
- o A need to work in paid employment, or a voluntary, social or community commitment that you do not want to loose.
- o Your own health
- o An Aspect of your life that may impair you in this organisation/work areas (e.g. your sight, your learning, your mobility)
- o A disability that may have an effect upon your performance in this organisation/work area
- o Your personal beliefs, religious practice and/or cultural needs (e.g. a prayer room).

For each statement listed, please indicate on the scale given below how **easy or difficult** you will find this aspect of preparation prior to your placement

**Please Note:** You need to click a 1-6 rating or N/A for all the questions otherwise the feedback will not output

### Scale

1 = Very Hard
2 = Somewhat Hard
3 = Hard
4 = Easy
5 = Somewhat Easy
6 = Very Easy

### Preparation for Practice Assessment Tool

---

#### Feedback Explained

Looking at your results below you can see how you have assessed your own preparation to go onto a placement. This section of the self assessment gives you graphs and tables of your scores, feedback on your level of preparation and an analysis of where you might be strongest, and where you might think about your need for development. On the left hand side are links to a number of resources that you might find useful.

**Compare results?** If you have taken this assessment before, you can [compare your last two assessments side-by-side](#).

##### Finance

The students who collaborated in the development of this tool all felt

Your

You have completed both sets of questions in this self assessment tool and have a score of **119**, which is created by simply adding up the answer values which you gave to the questions. This indicates that you may be confident and ready for placement in some aspects, but there are some areas where you are not very sure of your preparation. Have a look at the analysis

## Preparation for Practice Assessment Tool

### Feedback Explained

Looking at your results below you can see how you have assessed your own preparation to go onto a placement. This section of the self assessment gives you tables of your scores, feedback on your level of preparation and an analysis of where you might be strongest, and where you might think about your need for development.

#### Your Feedback

You have completed both sets of questions in this self assessment tool and have a score of **119**, which is created by simply adding up the answer values which you gave to the questions.

This indicates that you may be confident and ready for placement in some aspects, but there are some areas where you are not very sure of your preparation. Have a look at the analysis of your scores below. Which areas have you identified as hard for you? You will see there are resources to help you and an action plan you can use to identify how you can improve your preparation. Think about what support is available to you and who could you go to for help and advice. Also you might want to return to the self assessment after your placement to compare scores.

This page offers a detailed breakdown based on your answers.

#### SWOT Analysis

In this section of your feedback we have created a modified version of a 'SWOT' analysis ( strengths, weaknesses, opportunities and threats) SWOT Analysis is an analytical tool used in business strategic development, but with modification it can be used as a practical self-assessment tool.

We have modified it to indicate:

- Areas where your responses suggest you are already **strong**, these will make a powerful contribution to your work.
- Areas that you might consider **improving**, these may be areas of vulnerability to do with yourself or the placement, that could limit your success.
- Aspects that we think create **opportunities** for you, that managed well could support your achievement.
- Areas where we think aspects of your circumstances may be a **barrier to success** that you could aim to control and manage.

## Extensions

National & international dissemination-

*But..*

Who is using it?

Why are they using it?

Is it helpful?

Thank you.
