SIMON LUNN

The new Kunming Heritage and Culture Centre is a light weight steel framed building built onto the existing RC substructure that supports Jimbi Square and the existing buildings. A new bridge is designed over water to re-instate the original North South axis. A large tree, visible from the Square, invites visitors to cross the bridge and enter the Heritage Centre and the fountain square beyond. The newly created route takes a visitor through the new water garden and directly down into the fountain square, which is landscaped and now has plenty of seating, from which to view the various activities which will take place in the square.
